Design D+P david+pulvirentistudio

Semplicità e pulizia di linee per questo sistema di contenitori nati dall'idea di offrire la più ampia varietà di composizioni con il minimo numero di componenti. Tre gli elementi base del sistema: contenitore Alto, contenitore Basso e Top. Due le altezze con un'unica profondità e un'unica larghezza per i contenitori, che possono essere attrezzati con cassetti, cassettoni o ante e liberamente accostati o sovrapposti. Il Top è l'elemento aggregante e decorativo che creando un gioco di volumi vuoto/pieno dà carattere alle composizioni e ne enfatizza la funzione. Le finiture sono disponibili nelle principali essenze e in una vasta gamma di colori laccati opachi o lucidi, tutti combinabili tra loro, per dare totale libertà compositiva. Un sistema che soddisfa la crescente esigenza di personalizzazione dell'abitare contemporaneo.

This minimalist and streamlined configuration of containers and surfaces is beautiful in its simplicity: a small number of components can be rearranged to produce a surprising variety of shapes. The components include a High container, a Low container and a Top. The containers, of uniform depth and width but not height, can be fitted with drawers or doors. The containers can be shuffled, stacked and superimposed. The Top/raised surface, decorative as well as functional, unifies and characterizes the configuration. The finishings, available in the main wood essences and in a big range of mat or high gloss lacquered colours, can be mixed and matched to create highly personalized configurations.
